1) Annual Review and Update of Graduate Degree Program Requirements	24
2) Annual Review and Update of Graduate Admissions Requirements.....	25

1) OVERVIEW

This guide deals with the process to create, update and change both undergraduate and graduate courses. Unless specifically noted, the processes outlined in this document apply to both course types. Included in the appendices are processes for reviewing and updating program and admissions requirements.

2) GOVERNANCE

Curriculum related updates, including changes to existing courses, new course proposals, course regularizations, course deletions, and modality changes are reviewed by the UCLA Anderson Faculty Executive Committee (FEC) Curriculum Subcommittee. This committee is comprised of three tenured faculty members appointed by the Department Chair. Via approval of the 'UCLA Anderson Curriculum Changes Guide', UCLA Anderson's FEC delegates its authority on curriculum changes to the FEC Curriculum Subcommittee for all course types except Capstone courses. Other types of curriculum changes may still be reviewed by the FEC, at the discretion of the Department and/or FEC Chair. In any instance where a faculty member does not agree with the actions of the FEC Curriculum Subcommittee, faculty have the right to appeal the FEC Curriculum Subcommittee's decision to the FEC. The FEC will receive a report at each regular meeting of all recent courses reviewed and actions taken by the FEC Curriculum Subcommittee.

3) DEADLINES

The deadlines for the submission of any curriculum related changes, including changes to courses, new course proposals, course regularizations, course deletions, and modality changes are listed below. All required paperwork and approvals must be completed by these deadlines. **If the deadlines and requirements for submission are not followed, there may not be sufficient time for the actions/changes to be implemented in the requested quarter.**

For the **2024-2025 Academic Year**, the following deadlines will be in effect:

Effective Quarter:	NEW COURSE & COURSE CHANGE DEADLINES	
	In-person & Hybrid in-person Course(s)	Remote & Hybrid online Course(s)
Winter 2025	Monday, September 9, 2024	Friday, May 31, 2024
Spring 2025	Monday, December 2, 2024	Monday, July 8, 2024
Fall 2025	Monday, March 31, 2025	Monday, December 2, 2024
Summer Sessions 2025	Thursday, April 15, 2025	Friday, January 31, 2025

*Anderson students bid on Fall courses in mid to late June. Thus the date for new courses and course changes for the **FALL Quarter** occurs at the end of WINTER quarter.*

A. Deadlines for Remote or Hybrid Courses

Distance education courses are defined in the [UCLA Graduate Distance Education Policy](#) as “those in which 50% or more of primary instructional contact time occurs using one or more of the technologies included in the definition of distance education, with the instructor(s) and students being physically separate.” Please note that **distance education courses (new and/or modality changes) require up to six (6) months for the Academic Senate to approve.** The deadlines above take this into account.

Please note that even if a course was taught in a distance modality prior to Fall 2023, the course must now be sent through the UCLA Anderson and UCLA Academic Senate distance education approval process. Courses cannot be listed for enrollment in distance modalities unless the course has been approved by both the School and UCLA’s Academic Senate Committee on Degree Programs (Graduate) or Undergraduate Council (UgC).

PLEASE NOTE: Courses can only be taught in modalities approved for that course. Switching between modalities without an existing approval is not allowable per UCLA Academic Senate policy (see [Section 5.B.1](#)). Courses cannot be scheduled in unapproved modalities.

B. Changes involving other UCLA Departments/Schools/Colleges

In the instance whereby a change made to a UCLA Anderson course and/or program involves another university Department, School, or College, you will need to take into consideration their deadlines and requirements. Specifically, once any entity outside of Anderson is involved in a revision or the course creation process, you must allow further lead time beyond the stated Anderson deadlines. Additional time is needed to ensure appropriate approvals are obtained and there is sufficient time to go through the regular channels for official updating. You may also be asked to produce additional paperwork in a different format. For example, pre-requisite changes to the Undergraduate Minor in Entrepreneurship necessitate not only changes/approvals within UCLA Anderson but also with the leadership of any impacted Departments and the Undergraduate Council.

4) COURSE NUMBERING GUIDELINES

A. UCLA Course Numbering Conventions

Information about UCLA course numbering protocols for undergraduate and graduate courses can be obtained through the [UCLA Course Approval Manual](#) (effective Spring 2023).

B. UCLA Anderson Course Numbering Conventions

Note: An A, B, C etc. suffix should be used only to identify a sequence of related courses or a pre-requisite relationship.

Program Identifier (i.e. Subject Code)	Number Range	Explanation
MGMT	0 - 99	Undergraduate Lower Division
MGMT	100 – 199	Undergraduate, Upper Division
MGMT	200 - 299	Used by graduate courses, open to professional, doctoral, other non - professional program Master students or undergraduates with special permission.
MGMT	400 - 429	These numbers are reserved for core courses only across all 4 MBA Programs and in the MGMT series.
MGMT	430 - 494	These numbers are reserved for professional master's level Management electives; thereby expanding the elective pool of numbers beyond the MGMT 200 series. Note though that any elective course numbered in this range would only be accessible to professional program students at the master's level; this range of numbers does not allow for registration by doctoral, other non - professional program Master students or undergraduates with special permission.
MGMT	19, 89, 89HC, 99 188 A/B/C, 189, 189HC 375 495 – 499 501	These numbers are reserved for university-wide mandated courses and “UCLA” is given as their academic area name.
MGMT	At Large	This designation next to a course means that it is a school-wide course and can be used by any area/program in undergraduate (100 – 199 range) or graduate 200 – 299 or 430 – 494.
MGMT	Capstone	This designation is used to identify capstone courses.
MGMT MGMTFT MGMTFE MGMTGEX MGMTMFE MGMTMSA	400 - 429	These numbers are reserved for core courses only across all 4 MBA programs, the other professional Masters' programs and in the MGMT series as well.
MGMT MGMTFT MGMTFE MGMTGEX MGMTMFE MGMTMSA	430 - 494	Any electives specific to a program should only be numbered using the MGMTXXX 430 - 494 number range.
Note: MGMT 495 – 499 is reserved for university-wide mandated courses.		

UCLA Anderson Doctoral Program Course Numbering Conventions

Program Identifier (i.e. Subject Code)	Number Range	Explanation
MGMT	200 – 299	Non-Program-Specific elective courses. Used by graduate courses, open to professional, doctoral, other non - professional program Master students or undergraduates with special permission.
MGMT	596 – 599	University mandated Doctoral Research, Qualifying Examinations, Thesis and Dissertation courses. “UCLA” is given as their academic area name.
MGMTPHD	200 – 299	Used for Doctoral courses. Note: PhD courses are all considered “elective” and therefore do not follow the standard numbering protocol of designating core/elective courses in particular number series.

5) CURRICULUM GUIDANCE

In order to comply with UCLA’s WSCUC accreditation requirements, all syllabi need to include learning outcomes (i.e. learning objectives), evaluation, and grading information. The UCLA Learning Outcomes Assessment online resource (link: [ESTABLISHING STUDENT LEARNING OBJECTIVES/COMPETENCIES FOR COURSES](#)) provides supporting information and guidance.

A. Syllabus Requirements

All requests for curriculum related changes **must** include an updated syllabus. This is required for submission to the UCLA Academic Senate and Registrar. Failure to provide an updated syllabus can result in delays in course approval or non-approval by the Academic Senate.

1. UCLA Anderson Syllabus Template

- UCLA Anderson syllabus template:
 - [MGMTXXX_Syllabus_2024-05_TEMPLATE.dotx](#)
- UCLA Anderson annotated syllabus template:
 - [MGMTXXX_Syllabus_2024TEMPLATE_Annotated.docx](#)

Please note that syllabi should include all items explained in the annotated template. The following are the most critical:

- Course Number & Title
- Term, Units, Modality
- Instructor Title & Contact Information
- Pre- & Co-Requisites
- Course Description
 - Catalog Description: 40 words or less

- Expanded Description: This can be included in addition to the catalog description if the faculty member wishes to provide additional information.
- Learning Objectives
- Course Outline with contact hours shown under each module and with assigned readings listed
- Required Assignments & Weighted Percentages.
 - At least 50% of grade is based on individual work.
- Assignment Descriptions.
- Policies (*included in the template*):
 - Anderson and Course Policies
 - Attendance, Artificial Intelligence (AI) usage, Netiquette, etc.
 - UCLA Policies
 - Accessible & Inclusive Education Statement and Resources

B. Distance Education Requirements

1. UCLA Policies

At UCLA, distance education refers to a mode of instruction in which some or all students are separated from the instructor. As with in-person courses, a distance education course must support regular and substantive interaction between students and the instructor. UCLA Anderson is required to follow a) the [UCLA Graduate Distance Education Policy](#) (last updated Winter 2024, effective Fall 2023) and b) the [UCLA Undergraduate Distance Education Policy](#) (last updated Winter 2024, effective Fall 2023). Specific policies for undergraduate Summer Sessions and emergency waivers are outlined in the UCLA policy documents.

By UCLA policy, course modality ([In-Person](#), [Hybrid In-Person](#), [Hybrid Online](#), [Online Synchronous/Asynchronous](#), [Mixed Enrollment](#)) should be accurately indicated and visible to students when they register for courses. **A course cannot be changed from in-person to hybrid/online or vice-versa (or other distance modality) once students have begun registering.**

2. UCLA Anderson Specific Policies

If a faculty member decides to offer a distance education version of an existing course or offer a newly created distance education course, then in accordance with the University Graduate and Undergraduate Distance Education Policies, that course must go through the same approval process as a new course. **While the University has established a threshold for hybrid in-person courses as 51%+ of the contact hours being delivered in-person, UCLA Anderson uses a threshold of 60%+ of the contact hours being delivered in-person.** This Anderson specific requirement is in place to ensure we maintain compliance with the WSCUC threshold for our listed programs considering that our programs have a high volume of hybrid in-person, hybrid, and

remote elective options that can be chosen by the student to fulfill their program requirements.

a. MGMT or Program Specific Courses (e.g. MGMTFT) that are not Special or Variable Topics

If a course already exists and is being taught in an In-Person or Hybrid In-Person modality (with approvals for the applicable modality on file) and a faculty member wants to teach a section of that course in a distance modality (i.e. online synchronous, i.e. remote, hybrid-online), the faculty member should submit a separate proposal for the course to be approved as for teaching in a distance education modality. Please see [Appendix B](#) for a step-by step outline of the necessary process. When this proposal is approved by both Anderson and UCLA, a section can be created for the existing course to be taught in the approved distance modality. Note that in the course registration system, the modality is distinguished either by the section number or the “location” of the course that shows what modality will be used, i.e. online synchronous etc.

b. Special or Variable Topics Courses (e.g. MGMT 298)

Currently, if a faculty member proposes teaching a special or variable topic, the course proposal only goes through a review/approval process at the department level. If the faculty member wants to teach that special or variable topic in a distance modality (outside of hybrid in-person), according to the university’s distance education policy, a department only review/approval is not considered sufficiently rigorous. **Therefore, given the above constraint, a special or variable topic course cannot initially be taught in a distance modality (outside of hybrid in-person).** Only when/if a special or variable topic has been taught 3 or more times, meets the Anderson criteria for regularization, and is due to be regularized, can the course be put forward to the department and university for approval to be taught in a distance modality (outside of hybrid in-person) such as online synchronous (i.e. remote). Please see the [list of current Anderson variable topics courses](#) in this document (updated annually).

C. UCLA Course Modality Definitions

- 1. Distance Education Courses** are those in which 50% or more of primary instructional contact time occurs using one or more of the technologies included in the definition of distance education, with the instructor(s) and students typically being physically separate. Different types of distance education courses include:
 - i. Online Asynchronous Courses:** 100% of instructional content is delivered to students online with no required on-campus activities or mandatory face-to-face class sessions. All instructional activity (e.g., pre-recorded lectures, online

discussion boards), including assessment (e.g., quizzes, exams), is done fully online.

- ii. **Online Synchronous Courses (i.e. remote):** Primary instructional contact time is organized around scheduled meeting dates and times as listed in the Schedule of Classes when students enroll. Students join class sessions remotely and in real time utilizing videoconferencing technologies such as Zoom. In addition, these courses may use educational technology such as Bruin Learn for class activities, communications, and assignments completed outside of scheduled times. (Note: Some academic units, e.g. University Extension, or self-supporting graduate degree programs, may refer to synchronous online courses as “remote.”)
- iii. **Hybrid Courses** utilize a non-trivial combination of in-person (on-campus) and online primary (asynchronous and synchronous) instructional contact time. Educational technology and/or videoconferencing technology is used to supplant some portion of in-person instruction, reducing the time spent in the physical classroom. The in-person and any online synchronous course components are organized around scheduled meeting days and times listed in the schedule of classes when students enroll. There are two types of hybrid courses:
 - a. **Hybrid In-Person**, in which more than 50% (i.e. 51%) of the instructional contact time occurs in-person.
Note: As outlined in [Section 5.B.2:](#) at Anderson, hybrid in-person courses utilize a minimum of 60% in-person contact hours, not the UCLA definition of 51%+.
 - b. **Hybrid Online**, in which 50% or more of instructional contact time occurs online. For hybrid online, students are expected to be on campus for some learning activities and/or exams.
- iv. **Mixed Enrollment Courses** are those that utilize live streaming technology to enable in-person students to meet simultaneously with synchronous online (remote) students at times and on days listed in the Schedule of Classes when students enroll. Students may enroll in one modality (online synchronous or in-person) and participate in the same modality for the duration of the course.

D. When is Approval Required to Teach a Course in a Distance Modality?

Please note that courses with approved for distance status may also continue to be offered in-person if previously approved as such.

		Approvals Required to Teach in the Listed Modalities				
		In-person	Hybrid In-person	Online Synchronous	Online Asynchronous	Hybrid Online
Currently Approved As:	In-person	n/a	Requires Department approval	Requires Department and UCLA Senate approval	Requires Department and UCLA Senate approval	Requires Department and UCLA Senate approval
	Hybrid In-person	No approval required <i>(syllabus must be updated to match modality)</i>	n/a	Requires Department and UCLA Senate approval	Requires Department and UCLA Senate approval	Requires Department and UCLA Senate approval
	Online Synchronous	Requires Department and UCLA Senate approval	No additional approval required <i>(syllabus must be updated to match modality)</i>	n/a	Requires Department and UCLA Senate approval	No additional approval required <i>(syllabus must be updated to match modality)</i>
	Online Asynchronous	Requires Department and UCLA Senate approval	No additional approval required <i>(syllabus must be updated to match modality)</i>	Requires Department and UCLA Senate approval	n/a	No additional approval required <i>(syllabus must be updated to match modality)</i>
	Hybrid Online	Requires Department and UCLA Senate approval	No additional approval required <i>(syllabus must be updated to match modality)</i>	Requires Department and UCLA Senate approval	Requires Department and UCLA Senate approval	n/a

E. Special Topic Courses

A special topics course is created when:

- A ladder faculty member wants to create a new course and wants to have the ability to “try out” the new material before committing to offering it on an ongoing basis with a permanent number.
- A visiting or non-ladder faculty member wants to teach a new course.
- A particular subject area is new or emerging and the academic area wants to offer their students this material as an elective option for a period of time with the idea that it may or may not become a permanent part of the program.

Special Topics courses may only be taught in an in-person or hybrid in-person modality.

With respect to the student's transcript, Anderson can choose to have the sub-topic title listed on the transcript with the course number. This most clearly describes what subject matter was covered in the term/year that the student took the special topics course.

F. Variable Topic Courses

Variable topics courses cover material within a defined topic area and can have a series of different topics housed within them. The topic can change by term/academic year and instructor. Variable topics courses are courses which have a single permanent course number (i.e., MGMT 275) with a general catalog description and title. These can be referred to as "parent" courses as multiple topics can be housed under one course number which remains constant. Usually, the title of the permanent course number includes the word "topic."

A new variable topic "parent" course first goes through a formal approval process with the UCLA Anderson FEC Curriculum Subcommittee and then through the Division of Graduate Education and Registrar's Office to create the permanent overall course, its description and number. In subsequent years, when a new topic needs to be introduced or a topic is changed, the faculty member submits a syllabus detailing the new topic (including a reading list) to the FEC Curriculum Subcommittee for Anderson level review and approval. Given that these courses are often taught by Visiting Faculty, the intent is to ensure quality and consistency across the program offerings. Since this is only a change in topic, not an entirely new course, no approval from the Division of Graduate Education and Registrar's Office is needed, the approval of the new topic remains internal to the School.

If an area/program decides to make a particular topic a permanent course after three or more offerings, then the regularization process is followed. Note that variable topic courses cannot utilize a fully remote modality. However, if a variable topic is regularized, then a fully remote modality is an option. If a topic has not been taught in three or more years, then it should be deleted.

Exceptions to the above-mentioned practice of regularization of variable topics are the MGMT 458 A/B Global Immersion Two Quarter Plan and MGMT 459 International Exchange location/trip courses used in the FT MBA, FEMBA, EMBA and GEMBA programs. These are not recommended for regularization even if they have been taught four or more times within the last six years. Nor are they recommended for deletion, even if they have not been taught recently.

Currently, UCLA Anderson has these variable topics courses:

- MGMT 19 Fiat Lux Freshman Seminars (Undergraduate Lower Division)

- MGMT 88 Lower-Division Seminar: Special Topics in Management (Undergraduate Lower Division)
- MGMT 180 Selected Topics in Management (Undergraduate Upper Division)
- MGMT 268 Selected Topics in Marketing
- MGMT 273 Current Topics in Entertainment, Media and Sports (CEMES)
- MGMT 274 A/B Advanced Topics in Management Capstone (FT MBA)
- MGMT 275 Current Topics in Emerging Technologies and Markets (Easton)
- MGMT 458 A/B Global Immersion Two-Quarter Plan
- MGMT 459E International Exchange
- MGMTMSA 440 Variable Topics in Management
- MGMTMFE 431 Special Topics in Financial Engineering
- MGMTEX 439 – 440 Selected Topics in Management
- MGMT GEX 439-440 Selected Topics in Management
- MGMTPHD 234 Special Topics in Accounting
- MGMTPHD 242 Special Topics in Decisions, Operations and Technology Management

With respect to the student's transcript, Anderson can choose to have the topic title listed on the transcript with the course number. This most clearly describes what subject matter was covered in the term/year that the student took the variable topics course.

G. Courses Offered by Anderson Centers

Centers are not considered standalone academic areas/departments by UCLA. Therefore, any courses developed and offered by Anderson Centers need to be allied with an academic area. In most instances, Centers are aligned with the home academic area of the Center's Faculty Director. Any changes to courses offered by Centers, i.e. edits and/or deletions to the number, title, units, course description or deletion of the course itself will require the signature of the applicable Area Chair. The development of new courses or the regularization of special or variable topics will follow the standard procedures for these actions and will also require the signature of the applicable Area Chair.

Center	Home Academic Area
Center for Global Management	Global Economics & Management
Center for Media, Entertainment, & Sports	Marketing
Easton Technology Management Center	Decisions, Operations & Technology Management
Fink Center for Finance	Finance
Center for Impact	Strategy
Morrison Center for Marketing & Data Analytics	Marketing
Price Center for Entrepreneurship & Innovation	Global Economics & Management
UCLA Anderson Forecast	Finance
UCLA Ziman Center for Real Estate	Finance

H. Informal Cross/Multiple Listing of a Course with another UCLA Department

If a faculty member wishes to informally advertise a course to other departments on campus, they can prepare a course description along with a faculty biography and circulate it to the student affairs offices of other departments on a quarter-by-quarter basis. Please contact the appropriate Student Affairs office within Anderson if you have any questions.

I. Formal Cross/Multiple Listing of a Course with another UCLA Department

These courses are offered jointly by more than one department. They are identified by a capital “M” before the course number and the other course is identified in the description. They need not have identical course numbers, but all other aspects of the course must be the same such as title, units, requisites, format and level. The course is listed in both departments.

In order to cross list a course with another UCLA Department(s), the proposal must be reviewed and approved by the Chairs and FECs, of each of the departments involved with the course. The approval process outlined above is applicable for the Anderson approval.

Important Notes:

- 1) The cross/multiple-listed courses must be existing regular courses. Special or variable topic courses cannot be multiple/cross-listed.
- 2) All aspects of the course must be the same, such as title, units, requisites, format, and level.
- 3) All departments involved must agree to the offering of the course each quarter.
- 4) Once a course is cross/multiple-listed, it must always be cross/multiple-listed, it cannot go back to being offered in just one department.
- 5) All departments involved must agree to the removal of the cross/multiple-listing and the deletion of the course.

J. Process for the Deletion of a Course

In the event that a course is **no longer required in the program** or **has not been taught for five or more years**, a request for deletion should be submitted by the appropriate Program Area, Center Director, or Program Dean to [Hillary Reichman](#) (FEC Staff liaison).

6) Approvals Process by Type of Change

A. Change of a course from 4 to 2-units

If a 4-unit course already exists as an in-person or hybrid in-person course, a faculty member may offer a 2-unit version of the same course in the same modality (i.e. in-person or hybrid in-person), with approval of the Department Chair. The existing 4-unit course must also have departmental approval on file for teaching as an in-person or hybrid in-person course. The Chair’s approval must be provided to Hillary Reichman in advance of enrolling any students in the course. Please note that this process does not apply to any other

teaching modalities. If a faculty member wishes to make a 2-unit course into a 4-unit course, they take the 4-unit version of the course through the new course approval process.

B. Changes/Edits to EXISTING COURSES

The following changes/edits to courses require the review/approval internally from the FEC Curriculum Subcommittee and externally from the Division of Graduate Education or Undergraduate Council:

- Change to the course title
- Change to modality
- Change to the course catalog description (40-word limit)
Note: If the only change to a course is the expanded description, approval is not required.
- Change in learning objectives
Note: all courses are required to have learning objectives. A course change will not be approved by the Senate or entered into the Registrar's system without learning objectives.
- Change in course content relative to how the content is described in the learning objectives
- Substantive changes to assignment weights
- Change to pre-requisites/requisites
- Change to course number
- Change to units
- Change to grading (e.g. Letter or S/U grading)

The UCLA Division of Graduate Education requires the approval of the FEC (at Anderson via delegated authority to the FEC Curriculum Subcommittee) on any changes that affect the information in the University Catalog - which is all of the above.

Step	Process
1	Faculty Member(s), Area Chair or Faculty Director/Program Dean submits a request to Hillary Reichman (FEC Staff liaison) with the following information: • Summary of the change • Context and rationale for the change • E-mail from the appropriate Area Chair* or Faculty Director or Program Dean providing their support for the change • Any resource implications for the change (budget, space, library, materials) • Any potential impact on other program(s) • Effective date of the change (i.e. quarter) • Updated/revised syllabus in the Anderson template • If needed, a revised catalog course description of under 40 characters.

Step	Process
	*If the course content overlaps with another academic area, then approval needs to be obtained from both Area Chairs. <i>Note: If the course includes a change in modality (i.e. any instruction time not 100% in-person) additional information must be provided. See Appendix B for the process to approve distance education courses.</i>
2	Hillary Reichman (FEC Staff liaison) forwards the paperwork to the FEC Curriculum Subcommittee for review and approval. If warranted, the FEC Curriculum Subcommittee may request a wider review and/or approval of the changes either by the FEC, Department Chair and/or the department's Senate Faculty.
3	The individual(s) submitting the change(s) will be notified once the change has been approved by the FEC Curriculum Subcommittee.
4	Once internal approval is gained, the course syllabus (with all required elements) and course details are provided to the Senate/DGE for review. The DGE/Senate may request additional details and/or changes. Any substantive changes requested by the Senate/DGE may require re-approval by the FEC CSC.
5	Once the DGE/Senate approves the course, it is routed to the UCLA Registrar's Office final processing.
6	The individual(s) submitting the change(s) will be notified once the Registrar's Office has processed all approved updates and the course is ready for enrollment.

The FEC Curriculum Subcommittee uses the following criteria to review course updates:

- The syllabus is presented in the most up-to-date [Anderson template](#) or at least includes all sections outlined in the template/annotated template to ensure class, program, and school policies are clearly presented.
- Learning objectives are present, and all summative assessments are appropriate for measuring the learning objectives.
- At least 50% of the overall course grade is comprised of individual assignments (exceptions for capstones).
- No more than 40% weight is given to any one (1) assignment including the final exam/project (strongly recommended).
- Content is in alignment with area goals and/or current scholarship areas.
- Catalog description of 40 words or less.

C. Creation of a NEW COURSE

All new courses require review/approval within the School and the Division of Graduate Education/Senate, or Undergraduate Council.

Step	Process
1	Area Chair* submits an initial Statement of Support to the Department Chair with the following information included: • Proposed instructor • Proposed topic & course title • Proposed units • Outline of why the course is additive to the Anderson School's curriculum • A review of any potential overlap with courses currently being offered *If the course content overlaps with another academic area, the Statement of Approval needs to be submitted on behalf of both Area Chairs <i>Note: A Center based course must provide a statement of support from the associated academic area chair. Click here for a list of Anderson's Centers and the associated academic area.</i>
2	Department Chair provides approval to Area Chair(s) and (if applicable) the Faculty Director/Program Dean.
3	Once the Department Chair has approved the course for FEC consideration, the Faculty Member(s), Area Chair or Faculty Director/Program Dean submits a request via e-mail to Hillary Reichman (FEC Staff liaison) with the following information: • Department Chair's approval letter/email • A complete syllabus, including number of units (fixed or variable), readings, assignments and exams that contribute to the course grade, pre-requisites and instructional format. • Course description of 40 words or less to be included in the online university catalog. <i>Note: If the course changes includes a change to a distance education modality (i.e. any instruction time not 100% in-person) additional information must be provided. Please see Appendix B for detailed instructions of the distance education course approval process.</i>
4	Hillary Reichman (FEC Staff liaison) forwards the paperwork to the FEC Curriculum Subcommittee for review and approval. If warranted, the FEC Curriculum Subcommittee may request a wider review and/or approval of the changes either by the FEC, Department Chair and/or the department's Senate Faculty.

Step	Process
	Note: Once a new course has been approved by the FEC Curriculum Subcommittee only then can the instructor's appointment to teach the course be forwarded to the Staffing Committee for review.
5	The individual(s) submitting the request will be notified once the course creation request has been acted on by the FEC Curriculum Subcommittee.
6	Once internal approval is gained, the course syllabus (with all required elements) and course details is provided to the DGE/Senate for review. The DGE/Senate may request additional details and/or changes. Any substantive changes requested by the DGE/Senate may require reapproval by the FEC Curriculum Subcommittee. An online survey will be sent to the requesting individual. This survey contains all additional elements required by the UCLA Registrar's Office to create a course. The request will come from Patty Johnson, Senior Manager of Academic Services and Operations. No internally approved course can be advanced to the DGE/Senate without the completion of this survey.
7	Once the DGE/Senate approves the course, it is routed to the UCLA Registrar's Office final processing.
8	The individual(s) submitting the course request will be notified once the Registrar's Office has created the course and it is ready for enrollment.

The FEC Curriculum Subcommittee uses the following criteria to review a new course proposal:

- Whether the proposed course will fit well with the school's existing curriculum and the school's mission.
- The proposed course should avoid substantial overlap with existing courses' content.
- The course syllabus should meet the minimal rigor and workload set in place.
- An appropriate balance between theory (e.g., frameworks, academic journal articles) and practice (e.g., trade magazine articles).
- Learning objectives are present, and all summative assessments are appropriate for measuring the learning objectives.
- At least 50% of the overall course grade is comprised of individual (exceptions for capstones).
- No more than 40% weight is given to any one (1) assignment including the final exam/project (strongly recommended).
- Content is in alignment with area goals and/or current scholarship areas.
- Catalog description of 40 words or less.

D. Creation of a SPECIAL TOPICS COURSE

A special topics course designation is used when:

- A ladder faculty member wants to create a new course and wants to have the ability to “try out” the new material before committing to offering it on an ongoing basis with a permanent number.
- A visiting or non-ladder faculty member wants to teach a new course.
- A particular subject area is new or emerging and the academic area wants to offer their students this material as an elective option for a period with the idea that it may or may not become a permanent fixture in the program.

Anderson uses the “Special Topics in Management” courses which are numbered as MGMT 298D through E for the Master’s and Doctoral programs.

Note that special topic courses can only be taught with an in-person or hybrid in-person modality. However, if a special topic course is regularized, then a fully remote modality is an option. If a topic has not been taught in three or more years, then it should be deleted.

Any MBA special topics course, for which a **ladder** faculty member will serve as instructor, must be approved by the Area Chair(s), the appropriate Program Dean and the Department Chair.

Any MBA special topics course, for which a **non-ladder** faculty member will serve as instructor, must be approved by the Area Chair(s), the Chair of the Staffing Committee, the appropriate Program Dean, and the Department Chair. Such approvals must be obtained before the proposed instructor’s qualifications are reviewed by the Staffing Committee each time the course is proposed as an MBA special topics course offering.

Step	Process
1	Area Chair* submits an initial Statement of Support to the Department Chair with the following information included: • Proposed instructor • Proposed topic & course title • Proposed units • Outline of why the course is additive to Anderson’s curriculum • A review of any potential overlap with courses currently being offered *If the course content overlaps with another academic area, the Statement of Approval needs to be submitted on behalf of both Area Chairs. <i>Note: A Center based course must provide a statement of support from the associated academic area chair. Click here for a list of Anderson’s Centers and the associated academic area.</i>

Step	Process
2	Department Chair provides approval to Area Chair(s) and (if applicable) the Faculty Director/Program Dean.
3	Once the Department Chair has approved the course for FEC consideration, the Faculty Member(s), Area Chair or Faculty Director/Program Dean submits a request to Hillary Reichman (FEC Staff liaison) with the following information: • Department Chair's approval letter/email • A complete syllabus, including number of units (fixed or variable), readings, assignments and exams that contribute to the course grade, pre-requisites and instructional format. • Course description of 40 words or less to be included in the online university catalog. <i>Note: If the course includes a change in modality (i.e. any instruction time not 100% in-person) additional information must be provided. See Appendix B for the process to approve distance education courses.</i>
4	Hillary Reichman (FEC Staff liaison) forwards the paperwork to the FEC Curriculum Subcommittee for review and approval. If warranted, the FEC Curriculum Subcommittee may request a wider review and/or approval of the changes either by the FEC, Department Chair and/or the department's Senate Faculty. <i>Note: Once a new course has been approved by the FEC Curriculum Subcommittee only then can it be forwarded to the Staffing Committee for review.</i>
5	The individual(s) submitting the request will be notified once it has been processed.
6	Once internal approval is gained, the course syllabus (with all required elements) and course details is provided to the DGE/Senate for review. The DGE/Senate may request additional details and/or changes. Any substantive changes requested by the DGE/Senate may require reapproval by the FEC Curriculum Subcommittee. An online survey will be sent to the requesting individual. This survey contains all additional elements required by the UCLA Registrar's Office to create a course. The request will come from Patty Johnson, Senior Manager of Academic Services and Operations. No internally approved course can be advanced to the DGE/Senate without the completion of this survey.
7	Once the DGE/Senate approves the course, it is routed to the UCLA Registrar's Office final processing.
8	The individual(s) submitting the course request will be notified once the Registrar's Office has created the course and it is ready for enrollment.

The FEC Curriculum Subcommittee uses the following criteria to review a new Special Topics course proposal:

- Whether the proposed course will fit well with the school's existing curriculum and the school's mission.
- The proposed course should avoid substantial overlap with existing courses' content.
- The course syllabus should meet the minimal rigor and workload set in place.
- An appropriate balance between theory (e.g., frameworks, academic journal articles) and practice (e.g., trade magazine articles).
- Learning objectives are present, and all summative assessments are appropriate for measuring the learning objectives.
- At least 50% of the overall course grade is comprised of individual assignments (exceptions for capstones).
- No more than 40% weight is given to any one (1) assignment including the final exam/project (strongly recommended).
- Content is in alignment with area goals and/or current scholarship areas.
- Catalog description of 40 words or less.

E. REGULARIZATION of an Existing Special Topics Course

After three instances of being offered, all existing Special Topics courses will be considered for "regularization". A course is not automatically regularized. Typical reasons for non-regularization include subject matter that changes frequently, a course is offered by a visiting or an about to retire faculty member, changes in the curriculum, low enrollments or poor evaluations. Finally, if there is a compelling reason for a course to remain permanently as a Special Topics offering, a written justification must be submitted to the Department Chair and be reviewed on an annual basis thereafter.

Under special circumstances, a course can be considered for regularization after less than three offerings. This decision is at the discretion of the Department Chair, in consultation with the FEC Curriculum Subcommittee. On occasion, due to the scheduling of a course and the fact that regularizations are reviewed on an annual basis only, a course may have been offered four or more times before being considered for regularization. On an annual basis (usually during the summer but also dependent on the enrollment deadlines for the quarter of teaching), a list of all eligible special topics courses that have been offered three or more times will be drawn up to be reviewed by the Department Chair.

Faculty members teaching courses eligible for regularization will be contacted by Hillary Reichman (FEC Staff liaison) on any planned updates to the course. The Department Chair reviews course enrollments, instructor evaluations, and any noted content overlaps with other permanent courses currently existing at the School. The Department Chair may include a consultation with the appropriate Area Chair(s) and Faculty members(s) to gain feedback and determine if they wish to proceed with the regularization. If a course has not

been taught in five or more years, it should be marked for deletion after review with the applicable Area Chair.

Regularized courses are eligible to be submitted for approval to teach in distance modalities.

Note: If an up-to-date syllabus exists in the [Anderson template](#) and no major changes are planned by the teaching faculty member, the Department Chair in consultation with the applicable Area Chair can approve the course for regularization.

Step	Process
1	A list of all Special Topics course taught three or more times is created.
2	Hillary Reichman (FEC Staff liaison) contacts all faculty members with courses eligible for regularization. Assuming the faculty wants the course to be considered for regularization, an up-to-date syllabus in the Anderson template is requested.
3	Enrollments and course evaluations are gathered for each iteration of the applicable course.
4	Department Chair and applicable Area Chair(s) review enrollments and course evaluations for all eligible courses. A final list of courses to be put forward for regularization is created.
5	Faculty Member(s), Area Chair or Faculty Director/Program Deans are notified by Hillary Reichman (FEC Staff liaison) that the course has been approved for regularization. The following material is requested: • A complete syllabus, including the permanent title, number of units (fixed or variable), readings, assignments and exams that contribute to the course grade, pre-requisites, instructional format, and modality. • Course description of 40 words or less to be included in the online university catalog. • The course number should be listed at TBD <i>Note: If the course change includes a change to a distance education modality (i.e. any instruction time not 100% in-person) additional information must be provided. Please see Appendix B for detailed instructions of the distance education course approval process</i>
6	Hillary Reichman (FEC Staff liaison) forwards the paperwork to the FEC Curriculum Subcommittee for review and approval. If warranted, the FEC Curriculum Subcommittee may request a wider review and/or approval of the changes either by the FEC, Department Chair and/or the department's Senate Faculty. <i>Note: A permanent course number will be provided upon approval.</i>

Step	Process
7	The individual(s) submitting the request will be notified once the course regularization request has been acted on by the FEC Curriculum Subcommittee.
8	Once internal approval is gained, the new course syllabus (with all required elements) and course details is provided to the DGE/Senate for review. The DGE/Senate may request additional details and/or changes. Any substantive changes requested by the DGE/Senate may require re-approval by the FEC Curriculum Subcommittee. An online survey will be sent to the requesting individual. This survey contains all additional elements required by the UCLA Registrar's Office to create a course. The request will come from Patty Johnson, Senior Manager of Academic Services and Operations. No internally approved course can be advanced to the DGE/Senate without the completion of this survey.
9	Once the course is approved by the DGE/Senate, it is routed to the UCLA Registrar's Office final processing.
10	The individual(s) submitting the course request will be notified once the Registrar's Office has created the course and it is ready for enrollment.

F. Doctoral Courses

Doctoral courses are created and reviewed by their respective Program Areas not by the FEC Curriculum Subcommittee. **However**, doctoral courses are still subject to review by the Department Chair and the Academic Personnel Office with respect to course scheduling and faculty resources.

7) UCLA Anderson Contacts

Hillary Reichman

Senior Manager, Data & Insights; Faculty Executive Committee liaison
New course proposals, course updates, course regularizations

APPENDIX A

1) Academic Senate Process Documents

The UCLA Academic Senate now has a comprehensive set of documents on their website which outline the policies and procedures for proposals to establish, disestablish, or modify academic programs and units at UCLA (graduate and undergraduate). In addition, there is information about course approvals. A list of the Senate committees, their membership and contact information for the committees and Senate Office is also provided.

Link to: [Academic Proposals | Academic Senate \(ucla.edu\)](#)

2) UCLA Registrar's Office Course and Program Guides

The UCLA Registrar's Office also keeps a comprehensive set of documents on their website, including their [UCLA Course Approval Manual](#). Both resources listed in Appendix A are valuable for referencing policy and practice across UCLA.

Link to: [Course and Program Guides](#)

APPENDIX B

1) Step-by-Step Approval Process for Approved-for-Distance Courses

This process applies to the following course modalities:

- Online synchronous (i.e. remote)
- Online synchronous
- Hybrid Online

Step 1: Syllabus

- Deliverable(s): Course syllabus
- Owner(s): Instructor

- Process: Review syllabus and Graduate Distance Education Course Information Sheet with IDLX; see step 3

Step 2: Complete the Graduate Distance Education Course Information Sheet (GDECI)

Note: This document is provided once the request for approval is made by a faculty member.

- Deliverable(s): Draft of GDECI
- Owner(s): Instructor
- Process: Once the draft is complete, review with the IDLX team; see step 3

Step 3: Meet with IDLX to review syllabus and GDECI draft

- Deliverable(s): Syllabus and GDECI draft
- Owner(s): Instructor
- Process: [Click HERE](#) and select 'Distance Course Consultation (60 minutes)' to book an appointment with the IDLX team.

Step 4: Complete the Program Requirements Mode of Delivery Tracking Sheet

Note: This document is sent once the request for approval is made by a faculty member

- Deliverable(s): Course specific the Program Requirements Mode of Delivery Tracking Sheet
- Owner(s): IDLX (with support from program and/or instructor).
 - *Note that FEMBA students are limited to completing 15% of their total program units through courses offered in a remote modality.*
 - *EMBA students are limited to 12%.*
- Process: IDLX works with faculty member to create document

Step 5: Receive formal assessment of the course or a letter of support from IDLX

- Deliverable(s): Formal Course Assessment memo from Director of IDLX
- Owner(s): IDLX
- Process: IDLX provides letter/assessment after steps 1-4 are completed in partnership with faculty member.

Step 6: UCLA Anderson FEC course approval

- Deliverable(s): All documents created in steps 1-5.
- Owner(s): Instructor, IDLX, Hillary Reichman.
- Process: Hillary Reichman manages the internal approval process. Once the course has been approved for a distance modality by the Anderson FEC Curriculum Subcommittee, the paperwork and Anderson approval is sent to the Graduate Council's Committee on Degree Programs for review.

APPENDIX C

1) Annual Review and Update of Graduate Degree Program Requirements

The Division of Graduate Education (DGE) publishes [program requirements](#) for UCLA graduate degrees at [UCLA Graduate Programs](#). This site provides the official Graduate Council approved

program description and requirements for every UCLA graduate degree except for Dentistry, Law, and Medicine (which have their own unique requirements in accordance with accreditation and licensing bodies). All students are subject to the degree requirements as published for their program for the year in which they matriculate and until they complete their degree studies. Graduate degree program requirements are required to be reviewed and updated annually by Departments.

The call to review and update the program requirements is generally issued by the Division of Graduate Education in January. Please note, this call period is the only time program requirements can be updated as they must be approved and published by UCLA prior to students entering their programs in the Summer/Fall of each year. Changes cannot be made at any other time of the year. If an Anderson program is planning any type of change to their program requirements, **it is necessary to begin the review and approval process well before the call for program requirements.** This will provide programs with sufficient time to obtain the appropriate Anderson, Division of Graduate Education, and/or Academic Senate committee approvals.

Anderson makes one block submission of the school's program requirements, coordinated through the Chair's Office. Programs do not submit their changes individually. Prior to the call, all Anderson graduate programs will be asked to review their existing program requirements and indicate whether they have changes/updates to provide. If there are changes, a meeting will be set up to review the submission process, any proposed changes, and discuss additional information/materials needed to facilitate a smooth submission. Programs must submit final document(s) with the proposed tracked changes, along with the rationale for the changes by mid-to-late March to the Chair's Office (timeline is subject to change annually).

Changes to the program requirements are first approved by Anderson's FEC at a regular meeting. Once the FEC has approved the updated program requirements, the updates move to a department vote (this step is to be enforced per Division of Graduate Education policy as of the 2025-26 call). Once the department vote is held and approval gained, the information is forwarded to the Division of Graduate Education for further review and action. Minor changes to the program requirements such as clarifications and language edits are reviewed and approved by the Division of Graduate Education via delegated authority from Graduate Council's Committee on Degree Programs (CDP). Any major changes to the program requirements will be routed to the Graduate Council's CDP for review.

2) Annual Review and Update of Graduate Admissions Requirements

The Division of Graduate Education publishes admissions requirements for UCLA graduate programs at [UCLA Graduate Programs](#). This site provides the official Graduate Council approved admission requirements for every UCLA graduate program except for Dentistry, Law, and Medicine (students seeking admission to those programs apply directly to the respective

school). Graduate admissions requirements are required to be reviewed and updated annually by Departments.

The Division of Graduate Education's Diversity, Inclusion and Admissions (DIA) Office coordinates updates to current graduate admissions requirements through a process which occurs separately and on a later timeline than the degree program requirements updates.

The call to review and update the admission requirements is generally issued by the DIA in early April. Please note, this is the only time that admissions requirements can be updated as they must be approved and published prior to recruitment activities which begin in the Summer/Fall each year. Changes cannot be made at any other time of the year. If an Anderson program is planning any type of change their admissions requirements, **it is necessary to begin the review and approval process well before the call for admission requirements** so that you have sufficient time to obtain the appropriate Anderson, DIA, and/or Academic Senate committee approvals.

Anderson makes one block submission of the school's admission requirements, coordinated through the Chair's. Programs do not submit their changes individually. Anderson programs will each be asked to review their existing admission requirements and indicate whether they have changes/updates to provide. If there are changes, a meeting will be set up to review the submission process, any proposed changes, and discuss additional information/materials needed to facilitate a smooth submission. Programs must submit a final copy with the proposed tracked changes, along with the rationale for the changes by mid-April to the Chair's Office (timeline is subject to change annually).

As with program requirements, changes to the admissions requirements are first approved by Anderson's FEC at a regular meeting. Once the FEC has approved the updated admissions requirements, the updates move to a department vote. Once the department vote is held and approval gained, the information is forwarded to the Division of Graduate Education for further review and action. Minor changes to the admissions requirements such as deadlines, clarifications, and language edits are reviewed and approved by the Division of Graduate Education via delegated authority from Graduate Council's Committee on Degree Programs (CDP). Any major changes to the program requirements will be routed to the Graduate Council's CDP for review.
