MGMT298D: The Science and Strategy of Artificial Intelligence

A practical and hype-free survey of machine learning and AI methods. Open to *all*.

(Spring 2026, 4 Units, Siddiq)

Guided, hands-on exploration in Python and Google Colab. No prior coding experience required.

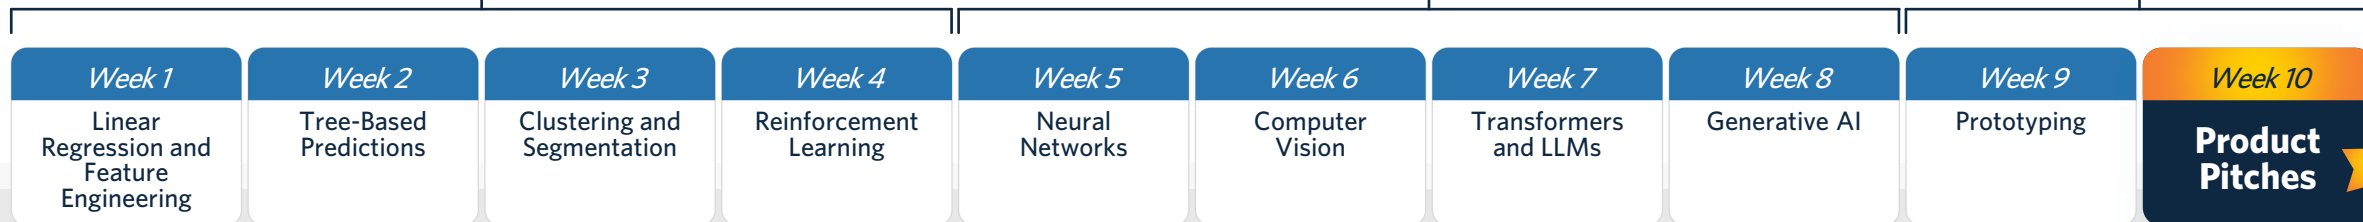

Connections to demand forecasting, pricing, customer segmentation, recommendations, autonomous vehicles, AI agents.

Prototyping an AI-powered micro web app.

Part I: Machine Learning

Part II: Deep Learning

Part III: Micro-App Development

Experience-based and test-free.
