MGMT298D: The Science and Strategy of AI

An intuitive, no-hype survey of essential AI models. Open to *all*.

(Spring 2026, 4 Units, Siddiq)

Explore in Python through **guided, hands-on** sessions.

Examine **practical** use cases from pricing and personalization to self-driving cars and AI agents.

Build a **live, public** AI-powered micro-app.

Part I: Machine Learning

Part II: Deep Learning

Part III: Micro-App Development

Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10
Feature-Engineered Regression	Tree-Based Predictions	Clustering & Segmentation	Reinforcement Learning	Neural Networks	Computer Vision	Transformers & LLMs	Generative AI	Prototyping & Publishing	Product Pitches

Test-free. No prior coding experience required. Join us!
